Applicants: Murdin et al. U.S.A.N.: 09/428,122

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An isolated polynucleotide from a strain of *Chlamydia* selected from the group consisting of:

- (a) a polynucleotide comprising the nucleotide sequence of SEQ ID NO:1; and
- (b) a polynucleotide that is at least 95% homologous to the nucleotide sequence of SEQ ID NO:1; and
- (e) a polynucleotide which hybridizes under stringent hybridizing conditions of 6xSSC containing 50% formamide at 42°C with a polynucleotide comprising the nucleotide sequence of SEQ ID NO:15

wherein administration of said isolated polynucleotide, in an immunogenically-effective amount to a mammal, induces an immune response in said mammal against infection by said strain of *Chlamydia*.

- 2. (Previously Amended) The polynucleotide of claim 1, linked to a second nucleotide sequence encoding a fusion polypeptide.
- 3. (Previously Amended) The polynucleotide of claim 2 wherein the fusion polypeptide is a heterologous signal peptide.
- 4. (Previously Amended) The nucleotide of claim 2 wherein the polynucleotide encodes a polypeptide comprising the amino acid sequence of SEQ ID NO: 2.

Claims 5-9 (Previously Canceled)

- 10. (Original) An expression cassette, comprising the polynucleotide of claim 1 operably linked to a promoter.
- 11. (Original) An expression vector, comprising the expression cassette of claim 10.

Applicants: Murdin et al. U.S.A.N.: 09/428,122

12. (Original) A host cell, comprising the expression cassette of claim 10.

13. (Previously Amended) The host cell of claim 12, wherein said host cell is a prokaryotic

cell.

14. (Previously Amended) The host cell of claim 12, wherein said host cell is a eukaryotic

cell.

Claim 15 (Previously Canceled)

16. (Previously Amended) A vaccine vector, comprising the expression cassette of claim

10.

Claim 17 (Previously Canceled)

18. (Previously Amended) The vaccine vector of claim 16, wherein said vector is in a

pharmaceutically acceptable excipient.

19. (Previously Amended) A pharmaceutical composition, comprising an immunologically

effective amount of the vaccine vector of claim 16.

Claims 20-24 (Previously Canceled)

25. (Previously Amended) A polynucleotide probe reagent that detects the presence of

Chlamydia in a biological material, comprising a polynucleotide that hybridizes with

the polynucleotide of claim 1 under stringent hybridizing conditions of 6xSSC

containing 50% formamide at 42°C.

26. (Original) The polynucleotide probe reagent of claim 25, wherein said reagent is a DNA

primer.

-3-

Applicants: Murdin et al. U.S.A.N.: 09/428,122

Claims 27-37 (Previously Canceled)

38. (Original) The host cell of claim 14, wherein said eukaryotic cell is a mammalian cell.

39. (Original) The host cell of claim 38, wherein said mammalian cell is a human cell.

Claims 40-41 (Previously Cancelled)

42. (Previously Added) The vaccine vector of claim 16, wherein said vector is a viral live vaccine vector or a bacterial live vaccine vector.

43. (Previously Added) The vaccine vector of claim 42, wherein said viral live vaccine vector is selected from the group consisting of: adenoviruses, alphavirus, and poxviruses.

44. (Previously Added) The vaccine vector of claim 42, wherein said bacterial live vaccine vector is selected from the group consisting of: *Shigella, Salmonella, Vibrio cholerae*, *Lactobacillus*, Bacille bilié de Calmette-Guérin, and *Streptococcus*.
